

3M DI-NOC Architectural Finishes: Why Your Office Needs It

U.S. Film Crew Article (Page 1 of 3)

Upgrading your workplace's interiors is a great way to attract new customers, create a new work environment for your employees, and reflect the quality of your company's brand.

Many offices opt for architectural upgrades, such as installing wall tiles or giving the interior walls a new paint job. While these are great ways to level up your workplace's interiors, they can be time-consuming and could interfere with your employees' work activities.

Enter 3M DI-NOC Architectural Finishes.

This is a vinyl film that's inspired by natural materials, like wood, stone, metal, and leather. It's designed to be applied to walls and ceilings, giving them a completely new appearance for just a fraction of the cost of traditional architectural changes.

3M's Architectural Finishes can be applied quickly, meaning that installation won't interfere too much with the workplace's daily activities and it comes in over 800 patterns, allowing you to give your workplace a more natural look, without sacrificing its aesthetic value.

Here's a deeper look into the advantages of 3M DI-NOC Architectural Finishes.

It allows you to get back to business—faster and better

Unlike a residential space, offices need to be in perfect working condition at all times, but most interior upgrades can cause delays and hamper workflows.

Architectural finishes, in contrast, don't require too much time for installation. Workplace activities will, therefore, experience minimal delays, and areas of the office that were sectioned off for installation can be accessible to your employees quickly.

These finishes are self-adhering and they can be applied on a variety of flat surfaces, from wood to stone, and won't require any kind of pre-construction for installation. It's also a very clean installation and will require little to no cleanup afterward.

3M's Architectural Finishes can be applied quickly and comes in over 800 patterns, allowing you to give your workplace a more natural look, without sacrificing its aesthetic value.

The realistic and natural appearance of these architectural finishes is also pleasing to the eye and can act as a mood booster for employees and improve their productivity.

It's easy to clean and maintain

Not only are 3M DI-NOC Architectural Finishes eye-catching, but they're also very easy to clean and maintain. They can also be repaired without needing replacement if they get torn or scratched.

This is a huge benefit for offices as they need to keep their interiors in good condition to leave a favorable first impression on customers and other external stakeholders.

These finishes are non-porous in design, which is why they're easy to clean. Strong cleaning solutions, however, shouldn't be used on them, especially ones that contain ammonia and chlorine.

Thanks to 3M's technology, these architectural finishes are very durable, making them suitable for installation on exterior walls.

It's sustainable and eco-friendly

3M DI-NOC Architectural Finishes are made from vinyl and don't use materials from trees; this is better for the environment as it doesn't involve cutting down trees and contributing to deforestation.

These finishes also allow surfaces in workplaces to mimic natural materials, like stone and wood. This way they can avoid procuring the actual materials and disturbing the environment.

In addition, 3M's Architectural Finishes are installed by professionally trained installers. These installers will not only ensure that the finishes are installed quickly, but they will also make sure that very little of the product goes to waste; this will add to your workplace's sustainability efforts.

Due to their durability, these Architectural Finishes can last up to 12 years if they're well maintained. This makes the finishes very eco-friendly as you won't need to dispose of and replace them often.

3M DI-NOC Architectural Finishes are made from vinyl and don't use materials from trees; this is better for the environment as it doesn't involve cutting down trees and contributing to deforestation.
