

3M Prestige Window Film: A Superior Window Film for Homes and Offices

U.S. Film Crew Article (Page 1 of 2)

For 30 years, U.S. Film Crew has offered commercial and residential clients in Pittsburgh and beyond some of the best window film solutions in the country.

Now we've decided to upgrade our range of window film with a more premium brand—3M Prestige window film.

We're very proud to announce that we're now a dealer for 3M Prestige window film—one of the best and most high-quality window film brands in the world! With 3M Prestige window film, we hope to offer our customers a premier product that sets itself apart from other window films.

Here's a look at what makes 3M Prestige window film special.

What is 3M Prestige window film?

The 3M Prestige series is a range of sun control window film that offers superior thermal regulation and other great features.

Most sun control window film uses metals to give them a dark tint, allowing them to reject heat and filter light. A common issue these window films have is that they are often too reflective and the metals made them susceptible to corrosion.

3M Prestige window film, on the other hand, is crystal clear and does not contain any metals, but still offers the same benefits as a standard window film.

Also, this window film was designed using state-of-the-art nanotechnology. Each window film is created using hundreds of layers, each being thinner than human hair, giving the final product a thickness less than a piece of paper.

The 3M Prestige series also offers a special type of film called 3M Dichroic Film that's designed to be sandwiched between two glass surfaces and will change color when viewed from different angles!

The 3M Prestige series is a range of sun control window film that offers superior thermal regulation and other great features.

Benefits of 3M Prestige window film

Here are some of the great benefits you can expect from these window films:

- ✓ It lasts longer and won't face corrosion damage because they don't have metals. Also, the film won't interfere with telephone signals.
- ✓ It can reject up to 97% of infrared light from the sun, allowing you to save energy and increase comfort.
- ✓ It can be either clearly or lightly tinted, but can still allow up to 70% of light to pass through windows.
- ✓ It comes with a comprehensive 3M Warranty that lasts for up to 15 years.
- ✓ 3M Dichroic film can be used with many different kinds of glass types
- ✓ It's less reflective, and this will help prevent glare.
